Fast Response Quality Experience

## We offer wide range of services, including:

Long term service agreements – provide complete services for heat treatment and vacuum metallurgical equipment

Spare parts for SECO/WARWICK equipment, as well as for furnaces from other manufacturers and for individual applications

Periodic inspection and servicing of equipment

Transfer (relocation) of equipment to any place in the world

### Technological support

Fully equipped R&D department with industrial sized heat treatment equipment  
Controlled Atmosphere Brazing (CAB) R&D Center

Cooperation with major, research centers, which significantly extends our capabilities to perform technological tests as well evaluate the range of research methods

Modernization and repairs of heat treatment and vacuum metallurgical equipment for all manufacturers with simultaneous fulfillment of all safety standards and in accordance with NADCAP standard:

upgrades of the heat treatment and metallurgical equipment to current safety and NADCAP standards  
modernization of temperature control, carbon potential control and other systems  
upgrades to more efficient heating systems, both electrically heated and gas fired  
modernization of control cabinets

upgrades improving the performance of the equipment  
modernization of AC / DC power systems used in vacuum metallurgy  
automation of the casting process  
replacement of hydraulic loading drives systems with electric ones  
major equipment repairs

### General inspection of the equipment:

leak tests of vacuum furnaces gas, air and vacuum pumping systems  
inspections of heating chamber and control instrumentations conditions in atmospheric furnaces

examination of the effectiveness of shielding against the harmful effects of X-ray radiation  
carbon potential checks

Oxygen probe calibration

Temperature uniformity measurements in accordance with standard AMS2750E

Start and adjustment of gas burners

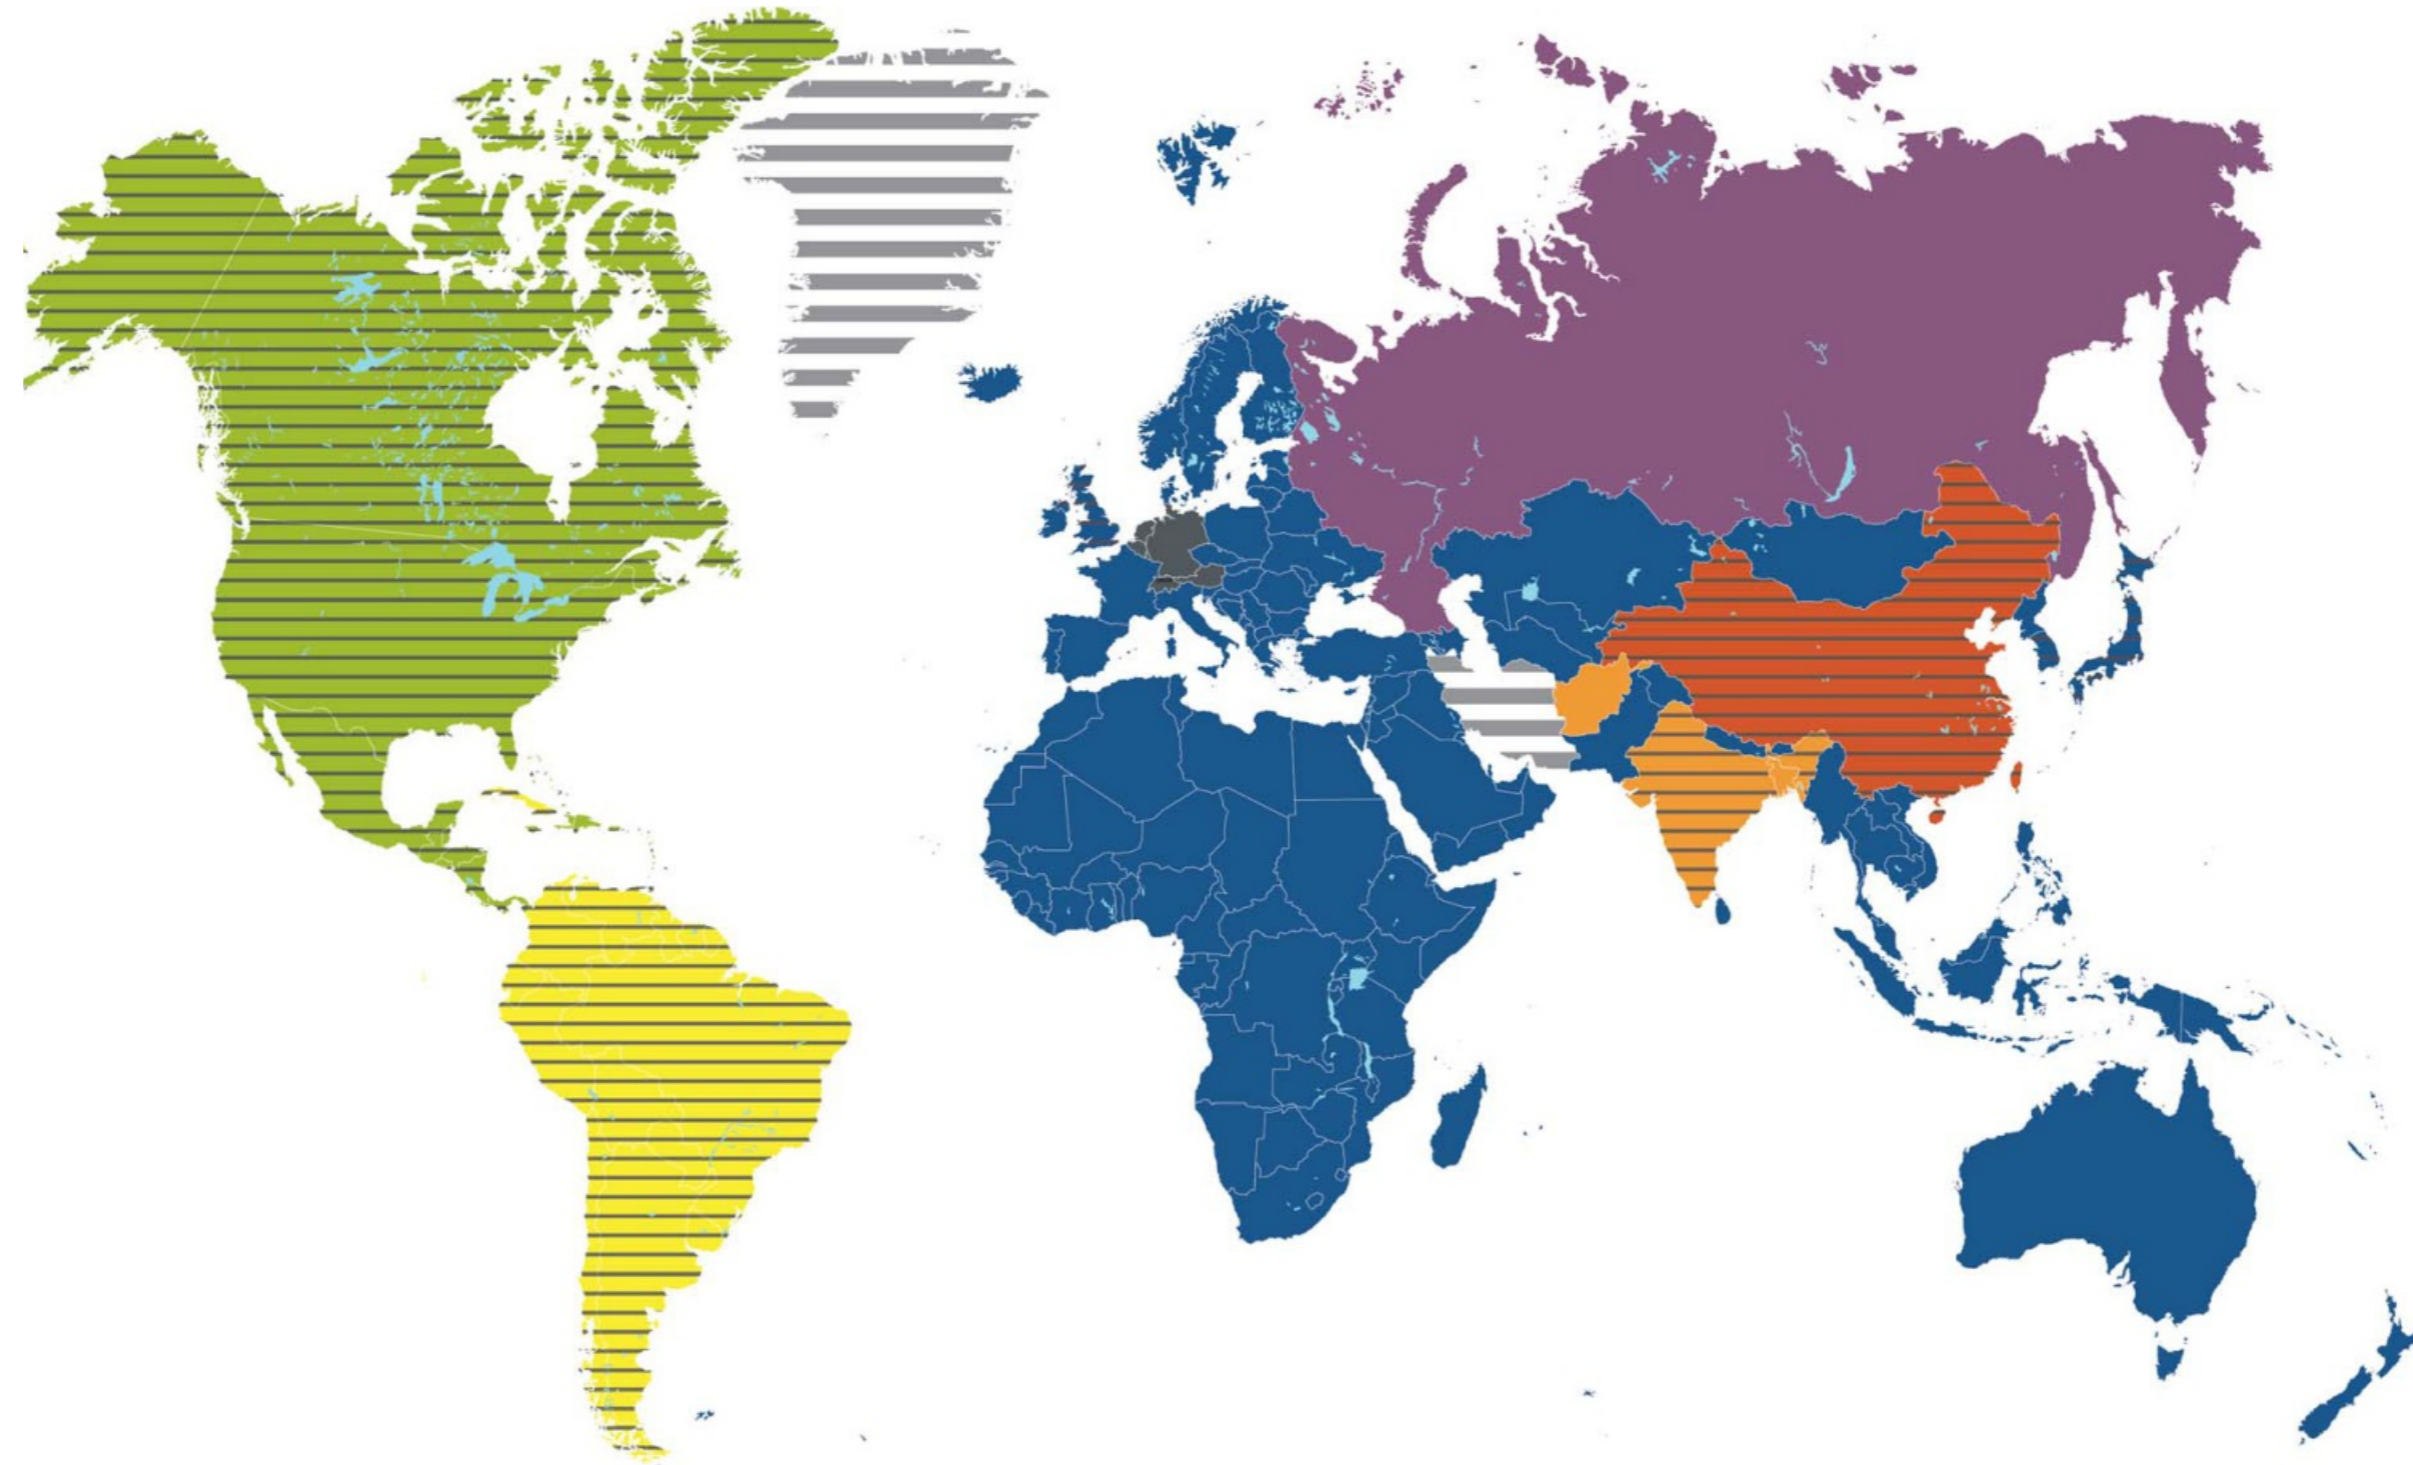

Measurement of: CO and CO<sub>2</sub> contents, temperature uniformity, dew-point and pressure in the furnace

### Consulting and training:

at Customer's site  
at SECO/WARWICK facility  
via Internet or phone
