SECO/WARWICK

INVENTION MEETS RELIABILITY

RECIPE MANAGER
RECIPE MANAGEMENT SYSTEM

Perfect solution for centralized recipe management across multiple devices.

RECIPE MANAGER
RECIPE MANAGEMENT SYSTEM

**PERFECT SOLUTION FOR CENTRALIZED
RECIPE MANAGEMENT ACROSS MULTIPLE DEVICES.**

Recipe Manager is a software for creating, synchronizing and comparing recipes across multiple devices. It is the perfect tool for technologists, as it allows them to access all recipes from one place and synchronize them with a database located on a specific device. The software also makes it possible to compare the parameters of different recipes, and to present the comparison results in a transparent form.

RECIPE MANAGER FEATURES:

/ control of all recipes from one place,
/ synchronization of recipes with
  any SECO/WARWICK device,
/ comparison of recipes from the same
  or different devices,
/ recipe status alerts: "in process," "in production,"
  "archived,"
/ recipe review, and import/export
  of recipes to a CSV file.

RECIPE MANAGER ADVANTAGES INCLUDE:

/ Time saving through managing recipes
  from one place;
/ Full history and control of parameter changes
  achieved through reviewing;
/ Integration with the furnace recipe database.

RECIPE MANAGER PROVIDES:

/ access to recipes from all your SECO/WARWICK
  devices, connection to the recipe database
  on a given device,
/ ability to transfer recipes from other sources
  via a CSV file,
/ better control of recipes by inputting their reviews and
  status, and a function to compare individual recipes and
  their parameters.

SECO/WARWICK is a technological leader in innovative heat treatment furnaces. Expertise includes end-to-end solutions in 5 categories: vacuum heat treatment, atmosphere and aluminum thermal processing, controlled atmosphere brazing of aluminum heat exchangers and vacuum metallurgy.

SECO/WARWICK Group has 9 companies located on three continents with customers in nearly 70 countries. The company provides standard or customized state-of-the-art heat processing equipment and technologies to leading companies in the following industries: automotive, aerospace, electronics, tooling, medical, recycling, energy including nuclear, wind, oil, gas, and solar and production of steel, titanium, and aluminum.
