

MEET OUR LEADERS

LET'S **meet**
EARL**EARL GOOD**

MANAGING DIRECTOR, RETECH, USA

In SECO/WARWICK from: April, 2017

My life in SECO/WARWICK GROUP...

”

My responsibilities vary depending on which hat I am wearing at the time. However, most of my time is spent focusing on the continued growth and development of the global VME team and Retech. My daily tasks could include things such as conversations with customers, suppliers, and lawyers, or traveling to visit customers in person. My tasks could also involve internal review of estimates, proposals, and terms and conditions on potential projects, and / or reviewing the status of current projects. It could also include things like interviewing potential new employees and discussions with various media members. Lately my time has been invested heavily in finding additional facilities for Retech in the Buffalo area.

In my job, I like...

...the nice part about my job is that every day is different and presents different potential challenges and opportunities for rewards.

My family...

My wife (Lori), two daughters (Callie and Madison), and a golden retriever puppy (Rosie)

My favorite tech-gadget...

I guess I would have to say my cell phone, because it can be taken everywhere and there is so much information available at your fingertips. The information is also available 24 hours a day, 365 days a year.

After work I like...

...to work out, I try to lift weights three days a week and run three days a week as well. The physical activity helps to clear my mind and relieve the stress for the day and it also allows me to stay in shape, which I feel is important.

I love...

My family – spending time with my wife, daughters, and our puppy are at the top of my list. I also love various sports, both from the standpoint of watching and participating. I have always been active in sports in some manner, although my playing days in some sports are coming to an end.

My hobby...

I have a few different hobbies that I enjoy. I like to travel to different places. I have visited 49 of the 50 states and also been to approximately 40 different countries around the world. It has been a great experience to get to so many different places to take in the scenery, meet people, and enjoy the local culture. I also enjoy golfing as much as my schedule allows. However, sometimes the golf is not always relaxing, depending on how I'm playing that day. Finally, I enjoy taking our dog for walks when possible.

My favorite movie or book or actor/actress or art or painter or sports idol...

My favorite movie is "50 First Dates". There are so many funny parts to that movie. My favorite athlete is Tom Brady – he has set such a high standard for performance for such an extended period of time. I think any leader should strive to do the same things.

When I was a young boy...

I always wanted to be a professional athlete. It would be a dream to be paid to play the sport you love.

My motto...

Always try to treat others as you would want to be treated

People don't know that I ...

...coached a travel club soccer team for a number of years that both of my daughters played on. We were one of the top ranked teams in the state of Pennsylvania for a good period of time

My hidden talent...

I guess I'm still looking for it, not much is hidden anymore at my age.

I never...

went sky diving. I always thought I would want to try it sometime, but I'm not so sure anymore

Makes me happy...

I always look forward to returning home after a day at the office or following a trip to see my wife and our dog. At least my dog is always happy to see me.

I like...

I enjoy good coffee, and dining at good restaurants which feature farm-to-table, good craft IPA beers, and good bourbon on occasion.

Alternative profession

Coaching a sports team
